

LA TERRAZZO

Terrazzo Surfaces

1.

La Terrazzo

La Terrazzo brings the industrial durability of concrete and the beauty of marble together in one surface.

We produce Terrazzo in tile and slab formats using two different methods; the first is to produce large blocks, these are then cut into slabs which gives almost endless scope in terms of style, size & formats.

The second method is to cast the terrazzo into templates of 300x300mm, 400x400mm, 600x600mm & 600x1200mm, these are pressed at high density to ensure durability. This is a more economical method.

La Terrazzo is available in slabs for worktops or custom tiles and objects.

You can create your own terrazzo design with custom colour mixtures and aggregate sizes.

All images in this brochure are to scale. Note, as La Terrazzo is a natural product there may be variation in colour and aggregate size.

Colours

All of the aggregates used in our terrazzo are marble. We have split our colours in to 4 categories.

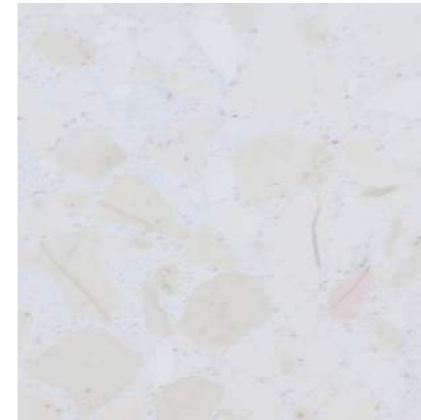

Grande, terrazzo with large aggregates.

Balencia, terrazzo with medium aggregates.

Piccolo, terrazzo with small aggregates.

Sfera, terrazzo with large rounded aggregates.

Formats, Sizes & Finishes

La Terrazzo is made to order.

Our Terrazzo tiles are available in 3 finishes; textured, honed and polished.

All finishes show off the vibrant stones emerging through the cement mixture. Only natural materials are used for our products.

La Terrazzo for Walls, Floors & Cladding

Grande, Balencia, Piccolo & Sfera available in following sizes:

300x300x18mm
400x400x20mm
600x600x22mm
1200x600x30mm

La Terrazzo also come in skirting & step treads to match your tiles.

La Terrazzo for Worktops

La Terrazzo is produced in slab form. This means we can create worktops, vanity units or even cut tiles to shape for your project. We have the latest waterjet cutting technology at our disposal, so cuts will be to the millimetre.

We can manufacture slabs up to 2450x1250mm

Longer units can be achieved with a joint.

All colour and finish options are available in slab form.
